

got data?

I'm an engineer and I write code to help small businesses use their data to make **smarter business decisions.**

I do:

Anything with
Excel
spreadsheets

Ask questions like:

*Who, what,
when or where
did something
happen?*

I can help:

*Sort, clean up
and visualize
your data.*

Ask me to:

*Make future
predictions
based on your
data.*

Check out my portfolio & let me know what you need!
